About me

This is atique. I have been playing around playing around in the web design and development area for about 10 years and have been using react and nodejs based stack for about 6-7 years. I dropped out university after 2nd year for some reasons and then trying my own way in this area. Initially did not look for job, tried to team up with friends for own company, tried some freelancing bounties but not everything in life goes according to plan but I'm still holding on to those. Currently I'm looking for job and hopefully I will be able to bring some value to your company in sha Allah.

Education

(2007 - 2009)
Secondary School Certificate
Bir Shrestha Noor Mohammad Rifles Public
School And College
GPA: 4
